

User Opinions

The easiest way to find, what is Find Duplicate Photos - is to hear, what other users tell about it.

Here are some short reviews, sent to us by people, who already use Find Duplicate Photos: "In the July issue of the "Computer World" magazine I read that Find Duplicate Photos - is the easiest way to find and remove duplicate photos on any computer. There are many family pictures are stored in our family picture collection, many of them are in my computer. From day to day picture file duplicates are collected, collected and today at least every third photo in my family picture collection. What to do? I wanted to find duplicate photos and remove them. First I wanted to find duplicate photos and remove duplicate photos in my family picture collection manually. But it took too much time. Then I remembered about that publication in the computer magazine. I downloaded and executed advised software and it found and removed duplicate photos, duplicate pictures and duplicate photos - Automatically! No my family collection is free from duplicate photos. Thanks a lot for all Find Duplicate Photos developers. They make life much easier."

George Colman, picture collector "At our design bureau are stored hundreds of different photos and pictures. We use them in our work. But every day to our photo collection is appended more and more pictures. It becomes very hard to find a photo that is needed for the current project. One of our designers already used on his home computer Find Duplicate Photos, an automatic duplicate photo remover that will find duplicate photos and remove duplicate photos on any computer. We used it and all duplicate photos were removed. There are no more duplicate photos in our picture collection. Find Duplicate Photos - is a very user-friendly duplicate photo remover that will find and remove duplicate photos on any computer. I advice to use it for everyone who has pictures on his computer and wants they to be in the perfect order."

Nicholas Moore, designer "In our office periodically is collected variety of documents in electronic form - they are needed for statistics gathering. Every Friday i create consolidated report, based on information, gathered from them. Day by day, month by month office documents collected on our file server, their quantity increased and increased, and to work with them became harder and harder. One Friday i could not find one document, needed for weekly report, and spent weekends in the office, sorting all documents by author and department, where they were created. Already was Monday, but report was still was not ready. Engineers from technical department installed, to help me, a special program for files organizing. It sorted all documents in minutes, directly as I want - first part by date, second part by size, and third part by author. Needed documents were found and from that time my work became much easier - Thanks a lot to Find Duplicate Photos creators team."

Michael Werner, office manager

"I am working in archive department of large production company. On our servers most of documents are stored in archived state. We receive them daily and we needed, before appending to common storage, manually open every archive file, view it's content and sort it, according to documents, located in it. All was OK, but after extending of company production level we became to get more and more archived documents for processing. Finally, leaving on the work until late at night. To solve this problem was installed Find Duplicate Photos and now it do all itself. Very powerful program - how we could be without it?"

Nikolas Flatley, director of archive department in production company

"Our department store all non-private files, transmitted over satellite network. Every day we receive millions of new files. All this data must be somehow organized, so any of our clients could easily find among that files what he need. We tried all file organizing tools, presented on market - and chosen Find Duplicate Photos. Why? Extremely flexible settings. We set up different processing rules for audio, video, text, executable files and archives. No one other program can do it today. "

Victor Acosta, chief engineer of data processing center That's what users say about Find Duplicate Photos. We hope, that it will be useful for you too. There are also presented other user reviews, not listed here:
